Re: Application of Duke Energy Carolinas, LLC for Approval of Rider 11, Demand-Side Management and Energy Efficiency for 2020  
Docket No. 2019-89-E

Dear Ms. Boyd:

On March 1, 2019 in the above-referenced docket, Duke Energy Carolinas, LLC (the "Company") filed an Application for Approval of Rider 11, Demand-Side Management and Energy Efficiency ("DSM/EE"). The Company now files herewith an Amended Application for Approval of Rider 11, Demand-Side Management and Energy Efficiency ("Amended Application").

On pages 4 through 5 of the originally filed Application, the Company acknowledged a benefit to customers that would result by reflecting the return of excess deferred income taxes ("EDIT") in lost revenues as part of Rider 11. For that reason, the Company anticipated an opportunity to incorporate changes to Rider 11 in order to reflect the Commission's decision on EDIT in its base rate case, Docket No. 2018-319-E. The Company now files this Amended Application to reflect those changes. As explained in the Amended Application, the Company is also taking this opportunity to correct a misallocation of a portion of My Home Energy Report invoices and to make two necessary Evaluation, Measurement, and Verification ("EM&V") adjustments. The Company is also filing herewith certain amended exhibits as provided in the table appended to the Amended Application; due to their size, and because they are not changing from the version filed on March 1, 2019, the Company is not re-filing Exhibits 5 through 8.

The net impact of these changes is a reduction in the Company's cost recovery from \$37,964,213 to \$37,077,223 for Residential Customers and from \$46,376,910 to \$45,825,880 for Non-Residential Customers. The Company acknowledges that the "Year 2018 EE Participant - True up" billing factor is increasing by 0.0001 cent per kilowatt-hour as a result of these adjustments. This increase, however, is more than offset by a decrease of 0.0037 cents per kilowatt-hour in the "Year 2018 EE

Page: 2

Participant - Prospective" billing factor. Therefore, the net impact of these changes for Year 2018 participants is a reduction of 0.0036 cents per kilowatt-hour from the originally filed Application. The Company therefore submits that no revised notice of this Amended Application is necessary. Further, the costs of requiring the publication and issuance of a supplemental notice would outweigh any potential benefit.

The Amended Application was provided to the Office of Regulatory Staff for review prior to this filing. Please contact me if you have any questions or concerns related to the Amended Application.

Kind regards,

Sam Wellborn
